

Sept 2014 Newsletter

1) Our study “Impact of environmental factors on the prevalence of autistic disorder after 1979” has been published in the Journal of Public Health and Epidemiology.

The new study reveals a significant correlation between autism disorder (AD) and MMR, Varicella (chickenpox) and Hepatitis-A vaccines. Using statistical analysis and data from the US Government, UK, Denmark and Western Australia, scientists at Sound Choice Pharmaceutical Institute (SCPI) found that increases in autistic disorder correspond with the introduction of vaccines using human fetal cell lines and retroviral contaminants.

The article can be reviewed at <http://www.academicjournals.org/journal/JPHE/article-abstract/C98151247042>

2) Fraud at the CDC uncovered, 340% risk of autism hidden from public

It's about time that mainstream media covered this instead of covering it up like the CDC did! “CDC Whistleblower William Thomas has released a formal statement confirming the original study found a link between MMR and Autism, especially in African American and that the CDC hid the results.”

Read more about this article at <http://ireport.cnn.com/docs/DOC-1164794>

3) A new video about an interview with Dr. Theresa Deisher on Adult Stem cell research

To view the video, please visit <http://soundchoice.org/stem-cell-resources/> or <http://www.stemcellresearchfacts.org/theresa-deisher-phd-adult-st>

4) Please pray for Henry, Dr. Deisher's son, who has been fighting against a cancer called aggressive Burkitts lymphoma group B

Henry is an example among many children who have been suffering from epidemic childhood leukemia and lymphomas which, according to Dr. Deisher, are also associated with the human fetal contaminated vaccines as is the rise of autism disorder.

PLEASE DONATE TODAY! WE RELY ON YOUR SUPPORT!

BY HELPING SOUND CHOICE, YOU ARE HELPING TO PROTECT OUR CHILDREN!
